4. Analysis Notes

Revenue grew steadily across all four quarters, increasing from \$120K in Q1 to \$200K in Q4, representing an overall growth of roughly 67%% over the year. Net profit followed a similar upward trend, rising from \$30K to \$70K, indicating improving operational efficiency alongside revenue growth.

Expenses also increased in line with business growth, but at a slower rate than revenue, which contributed to the improved net profit margin observed in the second half of the year.
